

Scenic Sandbank (SS)

Following a successful financial award from the Scottish Land Fund and lengthy negotiations with Argyll & Bute Council, Scenic Sandbank has recently completed acquisition of the former primary school site in the centre of the village for the purposes of a community garden. At time of writing some final clearance of invasive plant species from the land is expected to be underway shortly and it is intended that, with the assistance of local volunteers and contributions the garden will be developed through the summer months as a prominent feature in the village and, in time, be growing flowers, vegetables, etc and serve as a community meeting space for all.
