Attachments: LRB Plan.jpg

Good morning

Further to the e-mail of 23 October 2012 requesting further information, I can advise as follows.

1. A location plan at scale of 1:1250 showing the site outlined in red.
2. The site area of the plot alone measures 618 square metres. Including the access road and visibility splays the overall site measures 897 square metres. These measurements have been calculated using the red line shown on the drawings first submitted with the planning application.

I trust this is sufficient for your purpose.

This e-mail has been copied to those persons named in the Schedule of Form AB5.

Regards

Fiona

Fiona Scott
