8th August 2016

Dear Lynsey,

Campbeltown Common Good Fund - Application for Assistance

I refer to my previous letter of 24th June 2016 and would like to bring the Trustees up to date with our current situation. CCB has just started working with LEADER on an application: The Centenary Project - Sharing our Heritage. I am attaching the text of our Expression of Interest Form in which you will see that there are two items which cover the work needed to bring the Mercury Arc Rectifier back to life in simulated format. Firstly the actual work required and then the interpretation. Our request to them will be for £40,000 but we need to match that funding with a similar amount.

We have been making applications to many Trusts and Foundations over the past six months, 10 so far, with a total ask of £180,000 but have not had any success. Our own local fundraising has been more fruitful, selling of old cinema seats and memorabilia, receiving funds from the on going Seat Sponsorship Scheme, our website and Easy Fundraising venture for example. This has raised over £20,000, half way to the match funding needed for LEADER. A letter of intent from CCGF to help with this match would be of considerable assistance.

I would be grateful if this request could be put to the next meeting of the Trustees.

Yours sincerely,

JM
