

**Argyll and Bute Council
Development and Infrastructure Services**

Delegated or Committee Planning Application Report and Report of handling as required by Schedule 2 of the Town and Country Planning (Development Management Procedure) (Scotland) Regulations 2013 relative to applications for Planning Permission or Planning Permission in Principle

Reference No: 18/01614/PP

Planning Hierarchy: Major Application

Applicant: Executive Director Development and Infrastructure Argyll and Bute Council

Proposal: Erection of new leisure building including swimming pool, improved flood defences, new car park including public realm works and demolition of existing swimming pool

Site Address: Helensburgh Swimming Pool, 1B West Clyde Street, Helensburgh

SUPPLEMENTARY REPORT NO. 1

1.0 INTRODUCTION

The purpose of this report is to advise Members of additional information which has been submitted by the applicant in support of the above planning application, and to provide clarity on an application to Historic Environment Scotland (HES) to List Helensburgh Pier which has recently been received by them and to provide updated information in respect of representations made in respect of the application.

The additional information comprises the following reports:

- A Technical Note on flooding, wave action and minimum floor levels
- Amended surface water drainage details
- A recent application to list Helensburgh Pier before HES

2.0 TECHNICAL NOTE ON FLOODING AND MINIMUM FLOOR LEVELS

The Councils flooding advisor by response dated 11.10.18 confirmed that the proposal could be recommended for approval subject to the following condition:

Condition 10.

Notwithstanding the provisions of Condition 1, the development shall be implemented in accordance with the flooding amelioration details and recommendations set out in the Kaya Flood Risk Assessment (June 2018) and approved plans; 00045-02/004C, 00045-02/005C and 0045-02/009D

1. *Finished floor levels of the building shall be a minimum of 5.4m AOD*
2. *Detailed design of flood defences to be appropriate and fully account for wave overtopping through the lifetime of the development.*

3. *Flood plan to be developed and implemented. This to include actions to be undertaken in event of a flood, including safe evacuation.*

Further evaluation and discussions in respect of the proposals confirmed that the plant room of the proposed building would be below this suggested minimum floor level (4.7m AOD) and therefore not in strict compliance with the wording of the suggested condition. Further consideration of this matter has been undertaken between the applicant and the Council's Flooding Advisor and a short technical note has been submitted by the applicant clarifying that:

While the leisure centre as an entity has been designed with floor levels in the publicly accessible areas of the building of 5.4mAOD in accordance with the latest flood risk assessment advice, it is understood that the plant room will be located at a lower elevation of 4.7 mAOD for operational reasons. This is the same level as the adjacent car park and the plant room is not accessible to the public. 4.7 mAOD is also 0.22 m higher than the estimated 1 in 200 year predicted still water level (in 2080) of 4.48 mAOD. Flood risk to the plant room will be addressed by individual items of plant will sitting on plinths, some 300mm in height, giving an overall protection level of 5.0 mAOD. Flood water ingress to the plant room should be minimised by flood proofing of the door.

The building and the enhanced food defences which will surround it, together with pedestrian and vehicular access to it, have been designed with specific reference to the coastal location. It is fully recognised that climate change will have an influence upon future flood risk, and that the size of that influence is uncertain. Decisions on any adaptations to the current defences or further flood defence measures if necessary will be taken at the appropriate time in the future as climate conditions dictate or as established guidance is revised. The current designs have allowed for this by including for sufficient space along the development perimeter for potential raising of the sea defences to protect against further climate change and any consequent rise in the sea level.

The site is located within a SEPA Flood Warning area and development and implementation of a flood plan which ties into the SEPA Flood Warning and provides safe evacuation routes will further help mitigate potential flood risk.

It is therefore recommended that condition 10 is amended to reflect the lower floor level of the plant room.

As part of ongoing discussions on flooding matters, and to provide additional reassurance over potential climate change impacts raised in representations, it has also been deemed appropriate to amend condition 10 to require regular review of the flood defences to accommodate the findings of UK Climate Projections (UKCP) climate change scenarios (or their equivalent) which are published every 10 years or so.

Any substantive changes in projected sea levels and resultant wave action impacts from the estimates in the Kaya Report will be apparent upon review. Any required actions in respect of sea/flood defence measures, and the flood plan (including evacuation arrangements) will require to be undertaken to ensure the future safety of users of the building. The owner/operator of the land and building will also have a "Duty of Care" in respect of such matters.

Given that the most vulnerable groups can use the new facilities due to improved access it is considered expedient to amend the suggested condition to provide further clarification in respect of such matters to reassure third parties that the building and land shall be operated in a safe and appropriate manner, notwithstanding potential future climate change update information.

The Council's flooding advisor has therefore provided an updated response on 15.11.18 taking into account the above matters. It is therefore recommended that condition 10 be amended to state:

1. *Finished floor level of the main building to be at least 5.4 mAOD. Finished floor level of the plant room to be at least 4.7 mAOD. The plant room to incorporate additional flood mitigation measures including raised equipment and a flood proof access door.*
2. *The site operator(s) of the building, car park, and coastal defences must maintain appropriate flood mitigation measures through the lifetime of the development. This includes review of the defences by the site operator(s) following each new release of UK Climate Projections (UKCP) climate change scenarios or their equivalent.*
3. *Flood plan to be developed and implemented by the site operator(s) of the building, car park and coastal defences. This to include actions to be undertaken in event of a flood, including safe evacuation.*

Revised condition 10 is set out at **Appendix 1** to this report.

3.0 UPDATED SURFACE DRAINAGE PROPOSALS

At time of completing the previous report SEPA had concerns over the treatment of the surface water from the site and had requested that this be reconsidered. The matter was previously covered by the imposition of a condition requiring appropriate details to be submitted and approved prior to the commencement of development (Condition 11).

Updated proposals have been submitted by the applicant and SEPA have clarified by response dated 6.11.18 that:

We have completed our assessment of the revised surface water drainage arrangements provided by Patrick Parsons and would confirm that we are now satisfied with these proposed arrangements and these amended proposals address the concerns as detailed in our previous response – (PCS/160583 – 22August 2018).

Given that amended details have been submitted and approved by SEPA following the production of the last report, it is considered appropriate to amend condition 11 to require the implementation of approved details and not submission of details as was previously the case.

Revised condition 11 is set out at **Appendix 1** to this report.

4.0 APPLICATION TO LIST HELENSBURGH PIER TO HISTORIC ENVIRONMENT SCOTLAND (HES)

Following the completion of the previous report HES contacted the Council on 6.11.18 to notify them that an application had been received from a third party to list Helensburgh Pier.

Officers have sought clarification from HES on whether the site they were going to consider for listing had any materiality to the current planning application. It has been confirmed by e-mail dated 12.11.18 from HES that:

I can confirm that the site proposed for listing does not fall within the boundary of the application site. It instead relates to the pier head (to the southwest) and potentially the

stone built approach (to the west). Therefore the listing application will not impede or effect the outcome of the current planning application on 19 November.

For your information, our review of new listing proposals usually takes a period of 6 months. Please do get in touch if you require anything further.

Given the above clarification, and having regard to the fact that no listing of any part of the pier has been agreed or proposed by HES at this time, this is not considered to be a matter which impedes the proper determination of the current planning application by Members at this hearing.

5.0 Additional Representations

An updated list of those who have made representations for and against the proposals to 14.11.18 is included as **Appendix 2**. No new substantive planning matters have in the opinion of Officers been raised in these new representations. However the following matters have been raised by Mr J Black by objection dated 13.11.18

- The ownership of the ground is uncertain and the north part of the car park was donated to the town by Sir James Colquhoun which contains restrictive clauses.

Comment - Land ownership and/or restrictions on land title are not matters for consideration through the planning process in respect of restricting the implementation of a planning permission. These are legal matters and the grant of any planning permission does not override any legal restrictions on land which will, if necessary, require to be addressed by the developer. This is therefore not a matter of materiality to the determination of the planning application.

Members are also requested to note that Helensburgh Community Council, through Architecture and Design Helensburgh have on 1.11.18 submitted an addendum to their original objection of 29.9.18. This substantially comprises an evaluation of the proposal using the Scottish Governments "Place Standard" assessment tool.

6.0 RECOMMENDATION

It is recommended that planning permission be granted subject to the revised conditions appended to this report.

Angus Gilmour
Head of Planning, Housing and Regulatory Services

APPENDIX 1

CONDITIONS AND REASONS RELATIVE TO APPLICATION REF. NO. 18/01614/PP

1. The development shall be implemented in accordance with the details specified on the application form dated 20.7.2018 and the approved drawing reference numbers

1251-DB3-B01-01-DR-A-2000	Basement Plan
1251-DB3-B01-01-DR-A-2001	Ground Floor Plan

unless the prior written approval of the planning authority is obtained for other materials/finishes/for an amendment to the approved details under Section 64 of the Town and Country Planning (Scotland) Act 1997.

Reason: For the purpose of clarity, to ensure that the development is implemented in accordance with the approved details.

2. Prior to development commencing, an Environmental Management Plan shall be submitted to and approved in writing by the Planning Authority. The Plan shall address requirements arising from the construction phases of the development and shall inform the production of construction method statements. This shall include details of the following:

- A construction method statement to demonstrate how potential impacts on otters and their safety shall be incorporated into normal site working practices and having regard to the recommendation contained in the Protected Species Survey Report
- In the event that piling is required a noise impact assessment on Marine Mammals together with proposed mechanisms to mitigate any identified adverse impacts
- A ground works phasing and waste management plan associated with movement/storage of all waste materials.
- Details of the location of construction compounds to be formed
- Details of the number of existing parking spaces lost at each main construction phase of the development in order to minimise the loss of existing parking during construction.
- Details of any external lighting to be used during construction
- Full land restoration details; to ensure that the land within the application site where it has been physically altered by the construction of the development or demolition of existing buildings/structures and the ground level raised, is restored to an acceptable appearance.
- Details of arrangements to retain access for emergency services to the far southern pier head area delineated as area 16 in the proposed site plan.
- Adherence to the requirements of any other submitted and approved details and other conditions

The development shall be implemented in accordance with the duly approved Environmental Management Plan unless any variation thereof is agreed in writing by the Planning Authority.

Reason: To ensure unacceptable environmental, wildlife or amenity consequences do not arise due to the construction of the development and appropriate mitigation measures, where required, are implemented.

3. No development shall be commenced until the following plans and particulars have been submitted to and approved in writing by the Planning Authority in consultation with the Head of Roads. Thereafter the development shall be implemented in accordance with the approved details. Such details shall incorporate:

- (i) A detailed construction method statement including the construction phasing and the material delivery plan.
- (ii) The interim car parking arrangements to address the loss of existing parking provision during the construction phases.

Reason: In the interests of roads safety and to maximise available parking spaces availability during construction.

4. No public use of the building shall commence until a minimum of 155 parking spaces (including disabled spaces) and all vehicular servicing areas associated with the operational use of the building have been provided in accordance with the details hereby approved. Thereafter the remaining parking spaces shall be provided within 12 months of the building being first brought into use.

Reason: In the interests of roads and pedestrian safety and to ensure that there is sufficient parking to support the leisure facility and town centre.

5. Notwithstanding the effect of condition 1, no development shall commence until samples and/or full details of materials to be used in the construction of:
- (i) external material finishes of the building
 - (ii) any other visible walls/retaining structures to be constructed;
 - (iii) roads and parking areas;
 - (iv) footpaths;
 - (v) shared surfaces

have been submitted to and agreed in writing by the Planning Authority. The development shall thereafter be completed using the approved materials, or such alternatives as may be agreed in writing with the Planning Authority.

Reason: In order to secure the use of appropriate materials in the interests of visual amenity.

6. No occupation of the approved building shall commence until details for the arrangements for the storage, separation and collection of waste from the site, including provision for the safe pick-up by refuse collection vehicles, have been submitted to and approved in writing by the Planning Authority. Thereafter the duly approved provision shall be implemented prior to the first occupation of the building.

Reason: In order to ensure that satisfactory arrangements have been made for dealing with waste on the site in accordance with Policy SG LDP SERV 5(b).

7. Details the specific species and size/mix/numbers of the proposed planting throughout the site on those areas identified to be landscaped shall be submitted for the written approval of the Planning Authority in consultation with the Biodiversity Officer within six months of the date of this permission, together with details of the proposed maintenance regime associated with the planting and clarifying the parties responsible for such future maintenance. Thereafter the duly approved planting shall be implemented in the first available planting season following the substantial completion of the development. Any planting which fails to become established, dies, becomes seriously diseased or is removed within the first 12 months of having been planting shall be replaced in the following planting season with equivalent sizes and species as those originally required to be planted.

Reason: In the interests of amenity and biodiversity.

8. No construction plant and/or machinery shall be operated on the site outwith the following times: 08:00 – 18:00 Monday – Friday, 08:00 – 13:00 Saturday. No construction plant and /or machinery shall be operated at any time on Sundays, Bank or Public Holidays unless otherwise approved in writing by the Planning Authority in consultation with Environmental Protection.

Reason: In order to control noise nuisance in the interest of amenity.

9. Prior to commencement of development, full details of all external lighting shall be submitted to and approved in writing by the Planning Authority. Such details shall include the location, type, angle of direction and wattage of each light which shall be so positioned and angled to prevent any glare or light spillage outwith the site boundary. Thereafter the development shall be completed in accordance with these details

Reason: In order to avoid light pollution in the interest of amenity

10. Notwithstanding the provisions of Condition 1, the development shall be implemented in accordance with the flooding amelioration details and recommendations set out in the Kaya Flood Risk Assessment (June 2018) and approved plans; 00045-02/004C, 00045-02/005C and 0045-02/009D
1. Finished floor level of the main building to be at least 5.4 mAOD. Finished floor level of the plant room to be at least 4.7 mAOD. The plant room to incorporate additional flood mitigation measures including raised equipment and a flood proof access door.
 2. The site operator(s) of the building, car park, and coastal defences must maintain appropriate flood mitigation measures through the lifetime of the development. This includes review of the defences by the site operator(s) following each new release of UK Climate Projections (UKCP) climate change scenarios or their equivalent.
 3. Flood plan to be developed and implemented by the site operator(s) of the building, car park and coastal defences. This to include actions to be undertaken in event of a flood, including safe evacuation.

Reason: In order to ensure appropriate mitigation for flood risk and to safeguard public safety.

11. Surface water drainage to serve the development shall be implemented in full compliance with the details set out in the Drainage Impact Assessment 5th revision dated 11.10.18 and in accordance with the details set out in drawing G17050_200 concurrently with the construction of the development and shall be operational prior to the occupation of the development and maintained as such thereafter.

Reason: To ensure the provision of an adequate surface water drainage system and to prevent flooding.

12. Prior to the first occupation of the building, a comprehensive Green Travel Plan that sets out proposals for reducing dependency on the private car shall be submitted to and approved in writing by the Planning Authority in consultation with the Roads Authority. The Travel Plan shall include details of:

- i) The proposed monitoring schedule and reporting procedures;
- ii) The management of the Travel Plan identifying the persons responsible for implementation;
- iii) Proposed pedestrian and cycle infrastructure within the site and connections to existing networks;
- iv) Cycle parking provision and location within the site;
- v) Measures to improve public transport facilities;
- vi) Initiatives such as, electric car facilities, car share scheme and flexible working;
- vii) Employee locker facilities;
- viii) Travel information to be provided within the site.

Thereafter the provisions of the plan shall be implemented as part of the operation of the approved development.

Reason: To ensure an appropriate level of public transport infrastructure is available to residents of the new dwellings.

13. Prior to commencement of development, an assessment of the condition of the land shall be undertaken, submitted and approved in writing by the Planning Authority. The assessment shall determine the nature and extent of any contamination on the site and

identify any potential risks to human health, the water environment, property or designated ecological sites.

Where contamination is identified, then a detailed remediation scheme to bring the site to a condition suitable for the intended use must be prepared and be subject to the approval in writing of the Planning Authority. The scheme must include all works to be undertaken, proposed remediation objectives and remediation criteria. The scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

Any approved remediation scheme must be carried out in accordance with its terms prior to the commencement of development with the exception of those actions required to carry out remediation unless otherwise agreed in writing by the Planning Authority. Following completion of measures identified in the approved remediation scheme, a verification report that demonstrates the effectiveness of the remediation must be produced, and is subject to the approval in writing of the Planning Authority.

Reason: In order to ensure that contamination issues on the site have been fully investigated and remediated.

14. The level of noise emanating from the site following commencement of the permitted use shall not exceed the established background noise level LAeq (90) at the survey location by more than 5dB(A) unless otherwise approved in writing by the Planning Authority. Any plant and machinery should not produce any noise that has a distinguishable, discrete, continuous note or distinctive impulses.

Reason: In order to avoid noise nuisance in the interest of amenity.

NOTES TO APPLICANT

1. **The length of this planning permission:** This planning permission will last only for three years from the date of this decision notice, unless the development has been started within that period. [See section 58(1) of the Town and Country Planning (Scotland) Act 1997 (as amended).]
2. In order to comply with Section 27A(1) of the Town and Country Planning (Scotland) Act 1997, prior to works commencing on site it is the responsibility of the developer to complete and submit the attached 'Notice of Initiation of Development' to the Planning Authority specifying the date on which the development will start.
3. In order to comply with Section 27B(1) of the Town and Country Planning (Scotland) Act 1997 it is the responsibility of the developer to submit the attached 'Notice of Completion' to the Planning Authority specifying the date upon which the development was completed.
4. Notwithstanding the requirements of condition 13 in respect of addressing site contamination issues, the applicant's attention is drawn to the requirements of CAR General Binding Rule 10 to ensure all reasonable steps are taken to ensure discharge associated with construction does not result in pollution of the water environment.
5. All external lighting should be designed in accordance with the Scottish Government's Guidance Note "Controlling Light Pollution and Reducing Light Energy Consumption" 2007, Annexes A and B. Site specific advice may be obtained by contacting the Council's Environmental Health Officers.

6. The road improvements within West Clyde Street and at the junction with Sinclair Street will require approval under Section 56 of the Roads Scotland Act 1984. Contact should be made with the Argyll and Bute Council Head of Roads.

APPENDIX 2

As of 15.11.18 at 11.30am there have been 148 objections, 96 submissions in support and 4 Representations
