

Many thanks for this communication.

By way of further comment at this stage I merely wish to once again record my understanding of the assurance that was given to me by Mr. Harrison that should this development go ahead mature trees in the established woodland along the bank immediately to the east of the proposed development would be maintained and not felled such as to ensure that none of the property and land at Hawkstone Lodge is overlooked by the proposed development and privacy is maintained.

I have no other comments to make for or against this development.
