DETAILED LAYOUT EXPLANATION

— — — — These lines are to indicate where I intend the area directly outside the Tavelna Bar to be sectioned off. A cafe barrier style system will be used. To get access to this area access will be thru the Tavelna Bar at door opening on West Princess Street.

The tables and chairs I intend to use are - tables 70cm square and matching chairs that slide under the tables. The drawing indicates where the intended layout will be however I may move if unsuitable, however, social distancing will be 1m, maintained at all times.

(Due to not having the tables + chairs until such time as a yes is granted I have drawn in only 4 tables, if the area and social distancing allow I intend to use the space to maximise capacity to possibly 6 tables).

↓
5 foot

Pavement and walkways around the building will always be maintained to the current width of West Princess Street pavement of 5 foot to allow full access for wheelchairs, prams etc. Barriers will also be moveable should a larger area access be required.
