Performance is presented cumulatively for both Area and Council-wide levels. For individual Car Parks the income is presented on a quarterly basis.

FQ2 2022/23	£53,904	£13,203	Red

This indicator for FQ2 shows the cumulative amount of income collected is significantly lower than the cumulative target.

#### FQ2 Comment

The cumulative totals at FQ2 show an under-recovery of £40,701. In general, it is difficult to ascertain the exact reasons for under-recovery in parking income but it can be affected either way by such things as events, weather, commuting and so on. In addition to this, a delay in processing of cash or credit/debit card payments can also be a factor. In regard to this latter point, there is a minimum of £18k that has still to be processed with in the B&C parking income. This would still result in an under-recovery but reduces this from £40,701 to circa £22k.

Responsible person: Hugh O’Neill

This indicator for FQ2 shows the cumulative amount of income collected is significantly lower than the cumulative target.

### FQ2 Comment

The Service is working through a stock programme which will upgrade all parking terminals to enable multi payment options (cash, Cashless and Chip & PIN). At this point, 66 terminals out of 92 have been upgraded. The back-office system for the upgraded terminals is excellent and allows forensic review of the various payment modes. For FQ1 & FQ2 combined, the system shows payment totalling £573k for the upgraded 66 terminals. The remaining 28 cash only income is not shown on this system but may include an additional “payment in process” element (a lag on the income being added to the Councils ledger).

The cumulative total at FQ2 is shown as £491,454 against a cumulative target of £625,429; a shortfall of £133,975. However, even discounting the cash only terminals; there is circa £287k still to be processed, which would take the income over the target for FQ2.

Reporting Period	Target	Actual	Status
FQ3 2021/22	75%	80%	Green

### The percentage of street lighting faults are completed within 10 working days – Argyll and Bute

Reporting Period	Target	Actual	Status
FQ3 2021/22	75%	59%	Red

#### FQ2 Comment

The total number of Street Lighting jobs recorded as completed within FQ2 totals 214, up from 116 completed in the previous period. Of these jobs, 102 were completed "on time" within the 10day timescale, showing an overall increase of the performance figure from 29% in FQ1 to 48% in FQ2. Whilst jobs may have missed the completion "target" they were eventually completed, as the figures for new faults at 215 in the same period, shows that the small team of 3 electricians and one apprentice, are at present able to "keep pace" with new service requests. This however indicates the underlying issue related to "out of date" columns, cabling and control gear generally. The completion of the LED project in 2022/23, delayed due to Covid, will further reduce faults due to luminaire

failures and it is anticipated that the Street lighting Capital replacement programme 22/23 will start to address the underlying issue of ageing asset. It may however, take several years of further investment before this has an appreciable effect on the frequency of reactive repair requests.

Responsible person: Hugh O'Neill

The number of waste collection complaints has risen again slightly this month, with the most complaints received in the Helen sburgh and Lomond area. There were operational and staffing difficulties again over the months of July, August and September in this area. Discussions will continue with the local delivery teams in an effort to reduce the number of complaints next quarter. However, given the number of domestic and commercial properties services throughout Argyll and Bute this is still a good level of service.
