## APPENDIX 3 - FINDING OUR TREASURE - OUR THEORY OF ACTION

Outlined below is the Northern Alliance theory of action for our Phase 4 Plan. Input from practitioners from across the Northern Alliance has helped to shape this theory of action, with the Right Drivers at its heart. Practitioner comments from our engagement sessions show how this theory can be brought to life and have its potential unleashed :

### Northern Alliance Vision

'Developing a culture of collaboration, sharing of expertise, and creating local and regional networks to improve the educational and life chances of our learners.'

*"Openness, transparency, regular opportunities to discuss and evaluate what aspects are working well/not as successful and ways forward – collaborative approach but with direction and purpose."* Head Teacher

### Our Theory of Action

The Northern Alliance Phase 3 plan has helped us to set the foundations for collaborative improvement. We have a better understanding of how we can meaningfully collaborate. Our relationships are stronger and many networks of practitioners have experienced the benefits of working together. We have begun to see the impact of meaningful collaboration on outcomes for learners through our growing bank of case studies.

*"A 'case study' approach to problem solving where collaboration is focussed on meeting the needs of individual learners."*  
e-Sgoil Team Member

As a result, the phase 4 plan has been designed to step up a gear. Our sights are now firmly set on evidencing the impact of collaborative improvement on our learners. The plan sets out how we are going to realise our Northern Alliance vision over the next three years. Supporting us to achieve this, we have identified priorities for us to achieve which are driven forward by each of Michael Fullan's Right Drivers for Whole System Success:

- Wellbeing and Learning – feeling well and learning well
- Social Intelligence – how we work and learn together
- Equality Investments – breaking down the barriers to wellbeing and learning
- Systemness – working together to improve our system

### Our Measures

*"When goals involve new challenges, how can you possibly know if it is achievable, if it is realistic, and how long it will take you to achieve? In the absence of such knowledge, it may be better to set a learning goal or a broader performance goal that expresses your shared commitments and helps keep focused."*

Viviane Robinson, Student Centred Leadership

## Targeted Measures

Targeted measures help us to monitor improvement activity in relation to our driver priorities. Phase 4 priorities are set out within each driver workstream plan. Driver teams have developed aims and outcome measures for each priority which help us to understand whether theories of action lead to improved outcomes for and with our learners.

As our system matures, we are interested in finding out how targeted improvement activity as set out within driver workstream plans influences the wider system. The priorities within the phase 4 plan have been shaped to reflect what matters to our practitioners and to reflect local and national priorities. As we move forward, it is our theory that we will move towards a more joined up approach in tackling shared priorities. As a result, we have developed universal measures to capture to what extent we are building a sense of collective responsibility for improving outcomes for our learners in the north.

## Cross Cutting Themes

Within the plan there are four cross cutting themes which permeate driver activity:

- Collaboration
- Improvement
- Culture
- Digital

We have learned from activity within our phase 3 plan that these themes will help us to create the conditions for collaborative improvement, as they weave their way through driver activity within the plan and across the wider system.

In order to ensure we are making progress within these cross cutting themes, we are making use of a range of resources, as outlined below:

## Collaboration

Over the course of the Phase 3 plan, we have worked together to gain clarity around what it means to meaningfully collaborate. This has resulted in the development of the Northern Alliance Collaboration Framework, which was developed and then tested within our networks. The Framework helps us to understand what effective collaboration looks and feels like, with four core principles and ten indicators, taking us from 'latent collaboration' to 'deep collaboration'. This framework will be used to build a shared language and understanding of meaningful collaboration at class, school, setting, team, local and regional level.

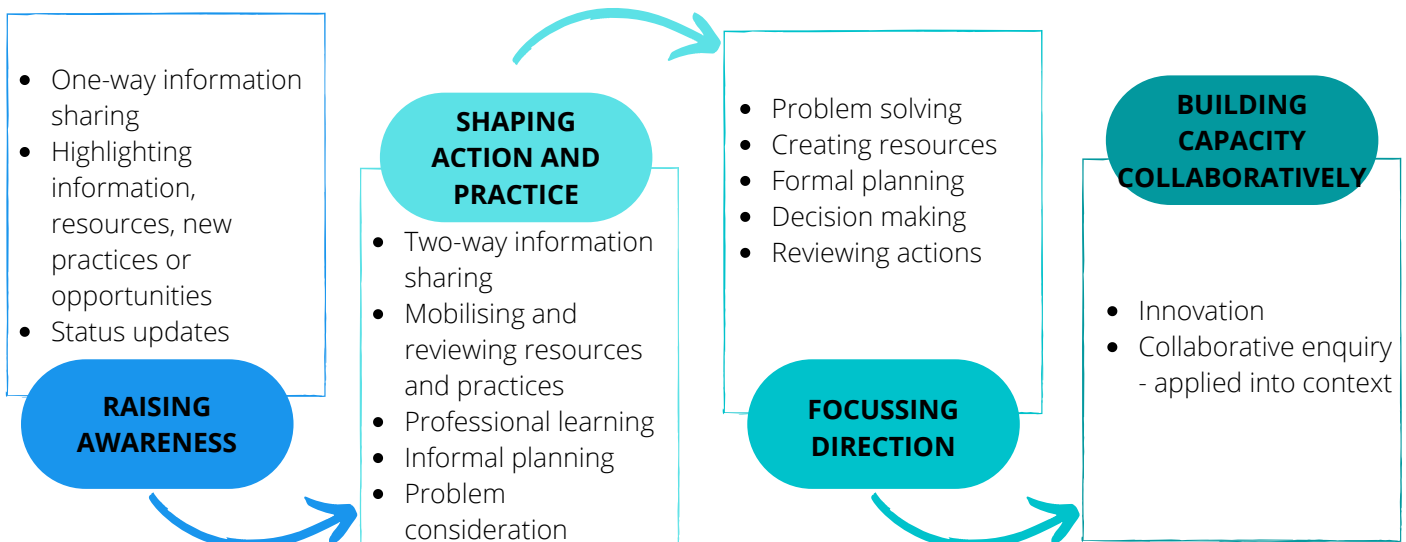

Using the framework, progress towards deep collaboration will be tracked within driver activity as well as understanding to what extent practitioners across the Northern Alliance are engaged in meaningful collaborative activity, which is resulting in improvement.

The Collaboration Framework has also helped us to develop a tool for tracking the different types of collaborative engagements within driver workstream activity. See diagram on below.

*"We need to prioritise time together to collaborate across schools."* Local Authority Officer

*"Using collaboration to tackle strategically the tough challenges that persist across the years and establishing conditions for solutions to be developed."* Education Scotland Officer

Based on evidence of progress so far, we predict a deepening of collaborative activity, with a greater emphasis on engagement in collaborative enquiry – focusing on impact on learners.

*“Creating/managing time for people to reflect/discuss/share/support and challenge each other with improved outcomes at the heart.”*  
Head Teacher

In order to understand whether changes made within priorities actually lead to improvement, the Northern Alliance workstream leads use an improvement methodology called the ‘Model for Improvement.’ This is a simple yet powerful tool for accelerating improvement, which has two parts:

- **The Thinking Part** – three key questions to help us plan for improvement
- **The Doing Part** – the PDSA (Plan-Do-Study-Act) cycle which supports us to test and implement changes. The PDSA cycle enables us to determine if the change is an improvement

The Northern Alliance driver teams have all engaged in ‘Model for Improvement’ professional learning and as a result, have developed:

- Measurable aims and a measure plan for each priority.
- Theories and change ideas to test whether they impact on process and outcome measures.
- Processes for tracking data over time to help them understand whether a change is leading to an improvement.

*“Everyone understanding improvement methodology and how to measure improvement and ensure change isn’t just for change’s sake.”*  
Head Teacher

These processes are also shared with practitioners in order to build capacity and confidence in planning for improvement within schools, settings and teams. Within each driver workstream, there is a focus on building improvement capacity and sharing practice through collaborative enquiry, which will ultimately help us to understand whether the changes we have made, lead to improved outcomes for learners.
