FQ3 Comment

The Council is maximising the distribution of this fund to support vulnerable people on low incomes tackle the cost of living challenges. As at 31 December spend on the fund is £444,000 and is projected to increase to £624,000 by the end of March 2023. This is well above the annual budget of £458,338. The Scottish Government has distributed more grant funding to Councils nationally to support them with the overspend and there is specific grant funding in earmarked reserves to cover the overspend this year. Therefore there is no issue with the position in terms of overall available finance the importance is ensuring as many households are support as possible during challenging times.

FQ3 Comment

Improved income in both MAKI and H&L areas but overall there is an under-recovery in income of £103,334. It is difficult to ascertain the exact reasons for under-recovery in parking income however it can be affected by such things as events, weather, commuting and a delay in processing of cash or credit/debit card payments can also be a factor. The impact of the waiving of charges for events in car parks, waiving charges in off-street car parks during winter festivals will likely have affected outturn.

This indicator for FQ3 is below target however performance has improved since the last reporting period.

FQ3 Comment

The team processed 45.5% of pre-applications enquiries within 20 working days against a target of 75%. That said, resource was diverted to an extremely high number (64) of Telecommunication Notifications [TELNOT] requiring processing by this team. As this application type is not reportable in Scottish Government performance statistics, it is not recorded in Pyramid despite being an ad hoc resource intensive activity.

Responsible person: Peter Bain

FQ4 2021/22	75.0%	56.3%	Red

FQ3 2022/23	75.0%	52.5%	Red	

This indicator for FQ3 is below target however performance has decreased since the last reporting period.

FQ3 Comment

With 52.5% of pre-applications being processed within the target of 20 working days, it is accepted that the performance of handling of pre apps is currently below expected standards it should however be recognised that the service is currently operating with reduced resource and high volume of statutory case work. Pre applications are non-statutory case work items and therefore afforded a lower priority in relation to statutory casework and is reflected in reduced standard of performance at this time.

Responsible person: Peter Bain

Householder planning applications – average number of weeks to determine – Helensburgh and Lomond

Reporting Period	Target	Actual	Status	Performance trend over the period
FQ4 2021/22	8.0 weeks	17.1 weeks	Red	
FQ1 2022/23	8.0 weeks	9.8 weeks	Red	
FQ2 2022/23	8.0 weeks	14.8 weeks	Red	
FQ3 2022/23	8.0 weeks	12.7 weeks	Red	

This indicator for FQ3 has not met the target however performance has improved since the last reporting period.

FQ3 Comment

This measure only relates to planning applications received for alterations to existing premises.

A disappointing average turnaround time of 12.7 weeks was posted by this team in FQ3, though it is an improvement on the previous FQ (14.8 weeks). Three applications took around six months to determine. That said, resource was diverted to an extremely high number (64) of Telecommunication Notifications [TELNOT] requiring processing by this team – these were applications which required to be responded to within a 28 day period and took priority and was resource intensive. As this application type is not reportable in Scottish Government performance statistics, it is not recorded in Pyramid despite being a drain on resource. Responsible person: Peter Bain

Householder planning applications – average number of weeks to determine – Argyll and Bute

Reporting Period	Target	Actual	Status	Performance trend over the period
FQ4 2021/22	8.0 weeks	13.8 weeks	Red	
FQ1 2022/23	8.0 weeks	12.4 weeks	Red	
FQ2 2022/23	8.0 weeks	13.1 weeks	Red	
FQ3 2022/23	8.0 weeks	12.0 weeks	Red	

This indicator for FQ3 has not met the target however performance has improved since the last reporting period.

FQ3 Comment

This measure only relates to planning applications received for alterations to existing premises.

Although a reduction of 1 week in average turnaround time was achieved on the last FQ, the headline performance figure of 12 weeks remains 50% above target. Much of this is attributable to the MAKI team where the Development Manager continues to perform the role of Area Team Leader in addition to his own duties, as has been the case for well over a year now. Whilst Officers may be processing householder applications timeously they are being held up awaiting managerial scrutiny and sign off.

Responsible person: Peter Bain

Benchmarking

The year-end statistics from The Scottish Government were published on 31st August. FY21/22 benchmarking figures have now been updated and FY22/23 have been forward projected in the usual way. Readers should note that our own Pyramid data in Development Management measures is "unadjusted", whereas that of the benchmarks (represented by the blue and green columns on the graph) is adjusted for "clock-stopping". Clock-stopping is where The Scottish Government allow for the removal of specific time periods for identified applications where delays were out with the control of the Local Planning Authority.

We provide a network of almost 15,000 streetlights across the Council area which is maintained by a team of 3 full time electricians and 1 apprentice electrician. In this last quarter we had 383 reported faults which means the performance in terms of the percentage of the network operational is in the region of 97.5%.

In this quarter we have completed 79% more jobs than in the last quarter (383 vs 214). While the percentage of jobs completed on time has dropped, the overall number of jobs completed has increased significantly.

As well as attending to the day-to-day fault reports our street lighting team are progressing with the final stages of the LED scheme which will see all of our network upgraded to a more energy efficient, more cost effective – this has already significantly reduced our carbon footprint. We will also be progressing a street lighting capital programme of column replacements thanks to last year's budget allocation.

Overall the street lighting team performs well in both maintaining and improving the network. This particular performance indicator is not necessarily reflective of the good work of the team and consideration is being given to other measures which could provide Members with a more comprehensive indication of lighting performance.

This has reduced landfill overall and has more than offset the reduction in recovery from the Helensburgh and Lomond area following on from The Scottish Government Landfill Tax Abatement Order (which commenced from 1st July 2022), whereby Barr Environmental no longer carry out any recovery from mixed residual general waste.
