Benchmarking

The year-end statistics from The Scottish Government were published on 31st August. FY21/22 benchmarking figures have now been updated and FY22/23 have been forward projected in the usual way. Readers should note that our own Pyramid data in Development Management measures is "unadjusted", whereas that of the benchmarks (represented by the blue and green columns on the graph) is adjusted for "clock-stopping". Clock-stopping is where The Scottish Government allow for the removal of specific time periods for identified applications where delays were out with the control of the Local Planning Authority.

Overall 22/23 f/year rates are 52.6% recycling/composting and recovery (39.2% recycling/composting plus 13.4% recovery). Recovery is higher than normal in PPP area due to a trial by Renewi (formerly Shanks), who have taken some residual general waste for disposal mainly from their Dalinlongart (by Dunoon) waste facility to an energy from waste (EFW) plant near Edinburgh. Recycling and composting in PPP area has also been higher mainly due to Renewi sending stockpiled wood waste for onward recycling and green garden waste for onward composting. These have both helped offset the reduction in recycling and recovery from the Helensburgh and Lomond area following on from The Scottish Government Landfill Tax Abatement Order (which commenced from 1st July 2022), whereby Barr Environmental no longer carry out any recycling or recovery from mixed residual general waste.
