Performance & Activity Report

From:	1st July 2023	To:	30th September 2023
--------------	---------------------------------	------------	---------------------------------------

Introduction

Welcome to the Scottish Fire and Rescue Service Community Board Performance Report. This performance report is designed to provide citizens, stakeholders and partners with information relating to Community Board based activity undertaken by the Scottish Fire and Rescue Service.

Whilst using historic statistical benchmarking data, consideration must be taken of the somewhat random nature of fire related incidents and events, and how this can pose difficulties in interpreting emerging patterns and trends. This is of specific relevance where Community Board level data is analysed due to the relatively small number of actual incidents/events that occur in Community Board areas.

However, regardless of statistical anomalies, emerging patterns and trends in fire related incidents and events can assist the Scottish Fire and Rescue Service and Community Planning Partners plan and implement preventative intervention initiatives to target reducing fire related incidents and events.

Incidents/Activities of Note

Unwanted Fire Alarm Signals (UFAS)

We continue to work with partners across Argyll & Bute to support duty holders in reducing unwanted fire alarm signal incidents. A new UFAS mobilisation policy has been devised by a dedicated project team within SFRS with an aim at reducing UFAS incidents further. This policy went live from 1st July 2023, and we have already seen a reduction in the number of UFAs incidents. This has been reflected in the relevant KPI's contained within this report.

Road & Water Safety campaigns

In this reporting period, we have continued to work with various partners across Argyll & Bute including Police Scotland, The RNLI and local business on Road and Water safety campaigns. During peak holiday season we visited hotels from across Argyll & Bute to give road safety advice, including delivery of Road Safety Scotland materials aimed at foreign drivers.

We continue to work with partners across all sectors, engaging with the local community at various identified hotspots. In June we held a multi-agency water rescue exercise at Mugdock Quarry to simulate a Tombstoning water rescue incident. This included SFRS personnel from across Argyll & Bute and allowed us to test operational resilience with an incident of this nature.
