- Indicators are grouped by Corporate Outcome.
  - The data table for each indicator is coded to identify the level of reporting.
    - Area level measures are blue

    - COI measures are white
  - Each indicator details the
    - Target, Actual and Performance status (Green / Red / No Target) for the current and four previous financial quarters.
    - Commentary for the current financial quarter only.
    - Narrative explaining the performance trend e.g. This indicator is above Target and performance has improved since the last reporting period.
    - Where appropriate a Performance Trend Line has been added.
    - The name of the Responsible Officer.
    - Where possible performance is presented at both Area and Council level.
- 1.3 The commentary for each indicator helps ‘Tell Our Story’ and enables Elected Members to put the performance data into perspective and understand if an issue is local in nature or should be escalated up to a Strategic Committee.
- 1.4 To improve the response to performance queries, it is requested that either the Responsible Named Officer or Sonya Thomas are contacted once the Quarterly Performance Report is received with any queries. This should enable some queries being resolved or clarified prior to the Area Committee meeting, and therefore being carried forward as Actions at a subsequent meeting.
- 1.5 As part of our improvements to performance reporting and making best use of the digital technology available to us, officers have developed new, online scorecards for members to view performance data. These were well received by members at a recent seminar and will be made available, as requested, for the December Area Committees, with training provided in advance.

## **2.0 RECOMMENDATIONS**

2.1 It is recommended that the Area Committee –

- a) Notes and considers the performance and supporting commentary as presented.
- b) Upon receipt of the Quarterly Performance Report the Area Committee contact either the Responsible Named Officer or Sonya Thomas with any queries.

#### FQ2 Comment

From 1<sup>st</sup> April 2023 to 30<sup>th</sup> September 2023 our Scottish Welfare Fund (SWF) spend is £307,746 which is an overspend of £78,606 on our profiled amount. Applications are slightly less than the same period last year however spend has increased by 15%. This is attributed to expenditure on Crisis Grants which is based on benefit income rates. These were updated by 10.1% in April 2023, so the amount paid out in crisis grant support has increased. The service is currently forecasting an overspend of £200k for the year.

#### FQ2 Comment

The purpose for car parking charging is to effectively manage vehicular traffic in and around our town and is not about Income Generation. Our current predicted outcome is based on data over several years which has now been skewed by Covid. Our vehicle count for the whole of ABC is approx. 10% less than pre-Covid which will also impact on the potential income. However, other factors such as the weather and cost of living crisis will also have an impact as well as fuel prices. When there are any known reasons that could affect potential income, these will be noted in advance to the Committee.

Going forward the Committee are asked to note the following factors that will affect car parking income in the OLI area:

- Corran Halls 1 has (incomplete) electric charger installs (from FQ1) which is affecting 15 bays.
- North Pier car park closures for cruise ship visits (FQ1 onwards).

Improvements to date include programme of data driven dialogue between Designated Managers and the Virtual Head Teacher, discreet identification of CECYP for class teachers and appropriate data sharing with partner agencies. Raising the profile of our CECYP has led to an increased awareness of this cohort, positively impacting on personalised support.

#### FQ2 Comment

Performance across Development Management continues to be impacted by an extended period of operating with key staff vacancies and a backlog of casework from the pandemic. The introduction of NPF4 in February 2023 by The Scottish Government and the subsequent progression of the Council's proposed LDP2 in June 2023 has further impacted on productivity and required a significant volume of casework to be re-assessed against the emerging policy background. During this reporting period available resource has been prioritised towards the resolution of statutory casework - the effect of this will be a detrimental impact on non-statutory casework including an extended time period to respond to pre-application enquiries. 56 PREAPP's were closed during FQ2 (up on the 48 of FQ1). 80.4% were processed within 4 weeks. 91.1% were processed within 6 weeks.

Performance across Development Management continues to be impacted by an extended period of operating with key staff vacancies and a backlog of casework from the pandemic. The introduction of National Planning Framework 4 in February 2023 by The Scottish Government and the subsequent progression of the Council's proposed Local Development Plan 2 in June 2023 has further impacted on productivity and required a significant volume of casework to be re-assessed against the emerging policy background. Improving resource availability has allowed the focus of the DM Service to move from addressing the most urgent applications to also addressing the wider backlog of application casework. The team determined 25 Householder applications in FQ2, up from 16 in FQ1. Despite the increase in volume of applications determined, the team reduced the average time taken to 9.2 weeks (from 10.6 in FQ1).

The determination of a higher-than-normal volume of legacy cases has a significant impact on "average time taken" performance measures, as a relatively small number of cases can readily skew the outcome. This is evidenced in that the performance time to determine the 83 Householder applications was 18.1 weeks, however if the four legacy applications are excluded, the time taken would have been 15.4 weeks. Of the Householder Applications determined in FQ2, 81% of applications determined were less than 6 months old at the time of determining, taking an average time of 11.6 weeks.

We maintain 14,442 street lights throughout Argyll and Bute, including the islands. Some street lighting faults cannot be fixed by the Street Lighting Team and we require assistance from power suppliers (SSE or Scottish Power) or our Roads colleagues/external contractors to repair underground cable faults and power supply issues. These type faults are often reported as single dark lamps but following attendance/investigation they can be identified as more serious problems that will take longer to repair. On average throughout the year approximately 98.8% of our street lights are operating/functioning as designed. Our Maintenance Team comprises 3x Street Lighting Electricians, 1x Clerk of Works/Inspector and 1x Trainee Team Leader. At present around 95% of assets have been upgraded to Energy Efficient and more reliable LED Luminaires. Works are continuing to convert/upgrade the rest of our inventory.
