Subject: Working with Community Planning Partnerships to reduce health inequalities. NHS Health Scotland's online resources for CPPs.

Dear colleagues,

We are writing to invite you to [visit NHS Health Scotland's 'shop window' web resource](#) to help you and your CPP reduce health inequalities.

Our shop window web pages contain the evidence, resources and tools to help you with your role in reducing health inequalities. These resources include:

- Evidence
- guidance
- briefings
- toolkits.

Our resources also include tools to help improve planning such as the [Health Inequalities Action Framework](#) and resources to help better understand local area needs, such as the [Good Places Better Health facilitator's handbook](#).

We have also produced a flyer which can be found on the home page of the website. This provides a summary of what can be found on the website and how it could help your CPP. We would be grateful if you could consider printing this off when meeting colleagues in your CPP and using it as a promotional tool. You can reach the website from the QR code on the flyer using their smart phone.

Like any useful website, we will regularly update it with new resources and materials and we will alert you know when we have new materials available. Please have a looksee if there's anything else that you think we should include. We value your feedback as we develop this resource.

So please think of us if you ever need any assistance. We'd be happy to help.

Our new website can be found on the [NHS Health Scotland website](#).

If you have any questions, please contact Health Scotland's Strategy and Engagement team by email (nhs.healthscotland-strategyandengagement@nhs.net)

We look forward to hearing from you.
