FQ2 2022/23	£625,429	£491,454	Red

This indicator for FQ2 shows the cumulative amount of income collected is significantly lower than the cumulative target.

FQ2 Comment

The Service is working through a stock programme which will upgrade all parking terminals to enable multi payment options (cash, Cashless and Chip & PIN). At this point, 66 terminals out of 92 have been upgraded. The back-office system for the upgraded terminals is excellent and allows forensic review of the various payment modes. For FQ1 & FQ2 combined, the system shows payment totalling £573k for the upgraded 66 terminals. The remaining 28 cash only income is not shown on this system but may include an additional “payment in process” element (a lag on the income being added to the Councils ledger).

The cumulative total at FQ2 is shown as £491,454 against a cumulative target of £625,429; a shortfall of £133,975. However, even discounting the cash only terminals; there is circa £287k still to be processed, which would take the income over the target for FQ2.

Benchmarking FY 2019/20, 2020/21 and 2021/22

The year-end statistics from The Scottish Government were published on 31st August. FY21/22 benchmarking figures have now been updated and FY22/23 have been forward projected in the usual way. Readers should note that our own Pyramid data in Development Management measures is "unadjusted", whereas that of the benchmarks (represented by the blue and green columns on the graph) is adjusted for "clock-stopping". Clock-stopping is where The Scottish Government allow for the removal of specific time periods for identified applications where delays were out with the control of the Local Planning Authority.

FQ3 2021/22	75%	28%	Red
FQ4 2021/22	75%	48%	Red

FQ2 Comment

The performance figure for the completion of street lighting faults in MAKI has recovered to close to its previous level, after a fall in the last quarter. A total of 36 jobs were completed in the period, double that of FQ1, with 17 completed within the 10day timescale, indicating a recovery in the performance to 47% completed "on time". Contained within the through-put of jobs, was 15 faults repaired on the islands network, as mainland-based resources were able to carry out a degree of "catch-up" within the overall programme for reactive repairs.

Reporting Period	Target	Actual	Status
FQ3 2021/22	75%	59%	Red

This indicator for FQ2 is below target however performance has improved significantly since the last reporting period.

FQ2 Comment

The total number of Street Lighting jobs recorded as completed within FQ2 totals 214, up from 116 completed in the previous period. Of these jobs, 102 were completed "on time" within the 10day timescale, showing an overall increase of the performance figure from 29% in FQ1 to 48% in FQ2. Whilst jobs may have missed the completion "target" they were eventually completed, as the figures for new faults at 215 in the same period, shows that the small team of 3

electricians and one apprentice, are at present able to "keep pace" with new service requests. This however indicates the underlying issue related to "out of date" columns, cabling and control gear generally. The completion of the LED project in 2022/23, delayed due to Covid, will further reduce faults due to luminaire failures and it is anticipated that the Street lighting Capital replacement programme 22/23 will start to address the underlying issue of ageing asset. It may however, take several years of further investment before this has an appreciable effect on the frequency of reactive repair requests.

FQ2 Comment

The number of waste collection complaints has risen again slightly this month, with the most complaints received in the Helensburgh and Lomond area. There were operational and staffing difficulties again over the months of July, August and September in this area. Discussions will continue with the local delivery teams in an effort to reduce the number of complaints next quarter. However, given the number of domestic and commercial properties services throughout Argyll and Bute this is still a good level of service.
