FQ3 Comment

The Council is maximising the distribution of this fund to support vulnerable people on low incomes tackle the cost of living challenges. As at 31 December spend on the fund is £444,000 and is projected to increase to £624,000 by the end of March 2023. This is well above the annual budget of £458,338. The Scottish Government has distributed more grant funding to Councils nationally to support them with the overspend and there is specific grant funding in earmarked reserves to cover the overspend this year. Therefore there is no issue with the position in terms of overall available finance the importance is ensuring as many households are support as possible during challenging times.

FQ3 Comment

This measure only relates to planning applications received for alterations to existing premises.

Although a reduction of 1 week in average turnaround time was achieved on the last FQ, the headline performance figure of 12 weeks remains 50% above target. Much of this is attributable to the MAKI team where the Development Manager continues to perform the role of Area Team Leader in addition to his own duties, as has been the case for well over a year now. Whilst Officers may be processing householder applications timeously they are being held up awaiting managerial scrutiny and sign off.

Responsible person: Peter Bain

Benchmarking

The year-end statistics from The Scottish Government were published on 31st August. FY21/22 benchmarking figures have now been updated and FY22/23 have been forward projected in the usual way. Readers should note that our own Pyramid data in Development Management measures is "unadjusted", whereas that of the benchmarks (represented by the blue and green columns on the graph) is adjusted for "clock-stopping". Clock-stopping is where The Scottish Government allow for the removal of specific time periods for identified applications where delays were out with the control of the Local Planning Authority.

We provide a network of almost 15,000 streetlights across the Council area which is maintained by a team of 3 full time electricians and 1 apprentice electrician. In this last quarter we had 383 reported faults which means the performance in terms of the percentage of the network operational is in the region of 97.5%.

In this quarter we have completed 79% more jobs than in the last quarter (383 vs 214). While the percentage of jobs completed on time has dropped, the overall number of jobs completed has increased significantly.

As well as attending to the day-to-day fault reports our street lighting team are progressing with the final stages of the LED scheme which will see all of our network upgraded to a more energy efficient, more cost effective – this has already significantly reduced our carbon footprint. We will also be progressing a street lighting capital programme of column replacements thanks to last year's budget allocation.

Overall the street lighting team performs well in both maintaining and improving the network. This particular performance indicator is not necessarily reflective of the good work of the team and consideration is being given to other measures which could provide Members with a more comprehensive indication of lighting performance.

This has reduced landfill overall and has more than offset the reduction in recovery from the Helensburgh and Lomond area following on from The Scottish Government Landfill Tax Abatement Order (which commenced from 1st July 2022), whereby Barr Environmental no longer carry out any recovery from mixed residual general waste.
