FEE GUIDANCE NOTES

The Town and Country Planning (Fees for Applications) (Scotland) Regulations 2022 (as amended)

1. INTRODUCTION

- a) With most types of application, a fee has to be paid to the Council. These fees are required by statute in respect of costs associated with processing an application. The appropriate fee has to be paid BEFORE an application will be entertained. It should be noted that a fee is required for the submission of an application and is NOT refundable if planning permission is refused or the application is subsequently withdrawn.
- b) The current fees for different types of applications are shown below. These fees may well be increased or varied in the future.

It is important to note that with certain categories of planning application an additional administration fee (currently **£235.00**) is required in respect of an advert required in terms of Regulation 20 of the Town & Country Planning (Development Management Procedure) (Scotland) Regulations 2013. All applications that are measured in hectares will automatically be rounded up if greater than 0.1 of a hectare (e.g. 0.17 will become 0.2). Further to the publication of the Town and Country Planning (Development Management Procedure) (Scotland) Regulations 2013, the Planning Authority are no longer required to publish a notice in a newspaper, in accordance with Regulation 20(1), if the application relates to householder development. It would be helpful to discuss an application with Development Management prior to submission of an application in order to establish whether Regulation 20 publicity is likely to be required.

Fees can be paid using the Scottish Government eDevelopment portal, online at: <https://www.argyll-bute.gov.uk/pay-it> or by crossed cheque and made payable to "Argyll and Bute Council". If there is a combined planning fee, warrant fee and publicity fee then it will be acceptable to lodge one cheque to cover all fees. It would be helpful to include a note explaining how the fee amount is allocated to each application
