COI - Maximise distribution of Scottish Welfare Fund

Responsible Person: Fergus Walker

This indicator is a Corporate Outcome Indicator that is reported quarterly. The performance presented is Council-wide only.

Period	Area	Target	Actual	Variance	Status	FQ3 Commentary
2024/25 FQ3	A&B	95.3%	79.7%	-15.6%	Red - Actual below Target	As at 31 December 2024 , our expenditure stands at £423,302. This represents an underspend of £107,914 of our budgeted profiled amount. To date the number of applications is down by 10% compared to the same period last year, however the average award amount has increased by almost £50. As in previous years we expect an increase in both applications and awards in the final quarter of this year.

This indicator for FQ3 is lower than the target however performance has increased since the last reporting period.

FQ2 Commentary

As of 30 September 2024, our expenditure stands at £258,079. However as our confirmed budget allocation has increased to £708,284 which includes £458,284 from the Scottish Government programme fund and £250,000 provided by the Council to address cost pressures. Therefore this represents an underspend of £96,065 to date. The number of applications to the fund is down by 11% in this quarter, however the average amount of award is higher compared to last year. As the next 6 months can be the most challenging for our vulnerable claimants we expect increases in both applications and spend going forward.

FQ2 Commentary

We are currently recruiting for a further warden who will be MAKI Based, the main P&D area in MAKI is Inveraray which only operates in the summer months which means it will be difficult to recuperate the lost income. The lack of a current full time warden may well explain the current deficit in income.

	2024/25 FQ1	27
	2024/25 FQ2	12
	2024/25 FQ3	26

FQ2 Commentary

There were 2 dog fouling complaints received this quarter for the Isle of Islay, 8 for Kintyre and 2 received for Mid Argyll, totalling 12. The number of complaints this quarter have reduced by more than half which is very good given that it was the summer holiday season too.

2024/25 FQ3	A&B	No Target	65	N/A	N/A	A total of 65 dog fouling complaints were received for the whole of Argyll and Bute this quarter. This may seem high, however it has been found that dog fouling can be seasonal with spikes in dark nights and dark mornings with a lot of dog walkers refraining from walking their dogs off the beaten tracks in the winter months. The warden service will continue to monitor as and when time allows.

	2024/25 FQ3	65

FQ2 Commentary

This quarter has seen the number of dog fouling complaints reduce significantly to 33 throughout the whole Argyll and Bute Council area, this is very good and is partly down to the presence of the Warden Service. In August the service recruited another Amenity Warden who will cover the Mid Argyll, Kintyre and Islay areas.

2024/25 FQ3	A&B	100%	100%	0%	Green - Actual meets Target	Each care experienced child and young person (CECYP) enrolled in an authority school has tracking and monitoring plans in place via our education management information system known as Seemis. Data collated includes attendance, exclusion, progress and attainment and wellbeing information. We are continuously working alongside schools and partner agencies to ensure the CE status is accurately reflected. Enhanced reporting and scrutinising of data, alongside greater awareness of our CECYP, has led to earlier and positive intervention. This is evidenced through our attainment data which shows a reduced learning gap between CE and non-CE learners since 2021 -22 (with both cohorts showing increased attainment). We continue to work with partner agencies to support cross authority tracking and monitoring to support CECYP hosted out with Argyll and Bute.

		Each care experienced child and young person enrolled in an authority school has tracking and monitoring plans in place via our education management information system knowns as Seemis. Data collated includes attendance, exclusion, progress and attainment and wellbeing information. The Virtual Head Teacher (VHT) for Care Experienced Children and Young People (CECYP) works closely with the education team and receives monthly reports specific to CECYP. The VHT has focussed attainment meets with Designated Managers for CECYP across authoriy settings. Our tacking and monitoring data is scrutinised during these meets to ensure each young person has the correct framework of support to help them achieve success. Our 2023 - 24 data (still embargoed to quality assurace process) evidences the positive impact of this enhaced level of scrutiny, support and challenge. The profile of our CECYP continues to be raised through system improvements, training opportunities, information sharing (as appropriate) leading to greater consideration of personalised support at all stages of the young peron's educational journey. Feedback evidences that wider school staff have increased awareness of the needs of our CECYP cohort. We are able to work with Virtual Head Teachers from Scottish wide local authorities to develop a data sharing agreeemnt to support cross authority tracking and monitoring to support CECYP hosted out with Argylll and Bute.

Performance across the Development Management Service continues to be impacted by a backlog of casework. Overall performance is improving across the Service as availability of staff resource has delivered improved output, however timeliness measures are adversely impacted as older casework from the backlog is completed. To assist with the management of customer expectations the target for responding to pre-app enquiries has been temporarily extended to 6 weeks. During FQ2 there has been considerable effort to close older pre-app enquiries and despite the impact of these older cases there has been a slight improvement of in time responses. During FQ2 41% of enquiries were responded to within 6 weeks.

2024/25 FQ3	MAKI	8.0	27.0	19.0	Red - Actual exceeds Target	Performance across the Development Management Service has been impacted by a significant backlog of casework. Whilst issues relating to staff resource availability have been resolved and output has significantly improved it is highlighted that KPI's measuring average time taken are adversely affected by the resolution of increasing volumes of 'legacy' casework which significantly skew reporting, particularly at area level where this relates to a small number of applications. During FQ3 16 'householder' applications were determined in MAKI; these included 4 'legacy' items. 	2024/25 FQ3	27.0

FQ2 Commentary

Performance across the Development Management Service continues to be impacted by a significant backlog of casework although performance is now improving alongside improved staff resource availability. Improved output does however involve the determination of increasing volumes of older 'legacy' case work. The determination of a higher than normal volume of older cases has a significant adverse impact on average time reporting measures as a small number of old cases significantly skew the overall output. FQ2 has seen the determination of 1 legacy item amongst a higher volume of newer casework. It is highlighted that during FQ2 75% of all householder applications determined were less than 6 months old and that these were determined within an average timescale of 9.6 weeks.

Whilst issues relating to staff resource availability have been resolved and output has significantly improved it is highlighted that KPI's measuring average time taken are adversely affected by the resolution of increasing volumes of 'legacy' casework which significantly skew reporting, particularly at area level where this relates to a small number of applications. During FQ3 60 'householder' applications were determined across all of ABC; these included 7 'legacy' items. Excluding the 'legacy' items the average time taken to determine the other 53 applications was 10.2 weeks.</p> <p>Please find links below for supplementary information on performance in this area: PPSL Committee - Development Management Performance Update: https://www.argyll-bute.gov.uk/moderngov/documents/s215679/DM%20Performance%20Update%202024-25%20FQ3%20PB%2010.01.2025.pdf</p> <p>Appendix 1: https://www.argyll-bute.gov.uk/moderngov/documents/s215680/Appendix%201%20DM%20Performance%20Update%20FQ3%202425.pdf</p>

Period	Area	Target	Actual	Variance	Status	FQ3 Commentary
2024/25 FQ3	A&B	70.0%	82.7%	12.7%	Green - Actual exceeds Target	In FQ3 there were 33,666 customer transactions dealt with by Customer Service Agents (17.3%) and 160,491 were automated or self-service transactions (82.7%) so the 70.0% target was substantially bettered. This was largely due to the significant increase in customers using the improved Bin Day Uplift online resources.

This indicator for FQ3 exceeds the target and performance has increased since the last reporting period.
