COI - Maximise distribution of Scottish Welfare Fund

Responsible Person: Fergus Walker

This indicator is a Corporate Outcome Indicator that is reported quarterly. The performance presented is Council-wide only.

Period	Area	Target	Actual	Variance	Status	FQ1 Commentary
2025/26 FQ1	A&B	95.3%	119.0%	23.7%	Green - Actual exceeds Target	In FQ1 2025/26, we received a total of 510 applications to the Scottish Welfare Fund, comprising 347 Crisis Grant applications and 163 Community Care Grant applications. We made 312 awards in total to the value of £135,819. 227 Crisis Grant awards and 85 Community Care Grant awards reflecting a 13% increase compared to the same period last year. Our allocated budget from the Scottish Government for 2025/26 is £458,284. Our expenditure of £135,819 at the end of FQ1 is £21,249 above the profiled budget for the quarter. This higher spend indicates the growing pressure on the fund and highlights the ongoing importance of the Scottish Welfare Fund in providing vital support to individuals and families facing financial hardship. The Council currently provides support for both medium and high priority cases under SWF and DHP. This is subject to ongoing review, and should circumstances require a recommendation will be made to restrict support to high-priority cases only.

This indicator for FQ1 exceeds the target however performance has decreased since the last reporting period.

	2024/25 FQ4	119.8%
	2025/26 FQ1	119.0%

FQ4 Commentary

The Scottish Welfare Fund has continued to provide vital support to vulnerable households across our community during 2024/25. Despite significant budgetary pressures, we maintained a strong focus on delivering high-quality, needs-based assistance through both Crisis Grants and Community Care Grants. A total of 1,134 households were supported, enabling individuals to remain safely in their communities and avoid crisis situations. Managing the fund within a constrained budget was a key challenge. While additional Council funding was required early in the year due to a projected overspend, prudent financial management and effective prioritisation reduced the actual draw on Council resources to £90,000. A one-off additional allocation from the Scottish Government in January 2025, although unused during the year, highlighted the inadequacy of the initial funding and has been carried forward to support demand in 2025/26. Overall, the service has performed strongly under pressure, maintaining a high standard of delivery and responsiveness.

Average number of weeks to determine householder planning applications

Responsible Person: Peter Bain

This indicator is reported quarterly. The performance presented is at area level and Council-wide.

Period	Area	Target	Actual	Variance	Status	FQ1 Commentary
2025/26 FQ1	MAKI	8.0	17.4	9.4	Red - Actual exceeds Target	Performance across the Development Management Service has been impacted by a significant backlog of casework. Whilst issues relating to staff resource availability have been resolved and output has significantly improved it is highlighted that KPI's measuring average time taken remain adversely affected by the resolution of increasing volumes of 'legacy' casework. The Council's target for 'householder' applications has been revised to 10 weeks although this is not yet reflected in the format of corporate reports. During FQ1 only a handful of 'householder' 'legacy' items remained, this has resulted in a general improvement across this particular performance measure. During FQ1 12 'householder' applications were determined in Mid Argyll, Kintyre and the Islands including 2 'legacy' items and is reflected in the significant improvement in performance reported for this period. Excluding 'legacy' items, the remaining 10 applications were determined in an average time of 9.0 weeks.

This indicator for FQ1 exceeds the target however performance has increased since the last reporting period.

FQ4 Commentary
Performance across the Development Management Service has been impacted by a significant backlog of casework. Whilst issues relating to staff resource availability have been resolved and output has significantly improved it is highlighted that KPI's measuring average time taken remain adversely affected by the resolution of increasing volumes of 'legacy' casework. The Council's target for 'householder' applications has been revised to 10 weeks although this is not yet reflected in the format of corporate reports. During FQ4 only a handful of 'householder' 'legacy' items remained, this has resulted in a general improvement across this particular performance measure. During FQ4 13 'householder' applications were determined in Mid Argyll, Kintyre and the Islands including 3 'legacy' items and is reflected in the significant improvement in performance reported for this period. Excluding 'legacy' items, the remaining 10 applications were determined in an average time of 15.5 weeks.

2025/26 FQ1	MAKI	104	105	1	Red - Actual exceeds Baseline	MAKI's 'empty' vacancy rate is 4.11%. Since the Empty Business Property Grant Scheme was approved in June 2025, 4 x Empty Business Property Grants have been approved. 2 projects in Campbeltown, 1 in Lochgilphead and 1 in Ardrishaig, for an accumulative value of £60,711.09. We have numerous live enquiries for properties in Lochgilphead, with others in Tarbert, Campbeltown and Bowmore. Please note: MAKI figures are skewed somewhat by a single property which has 20 entries in the valuation roll. Work is ongoing to explore methods to monitor 'demand' in our town centres as that data is vital to regeneration and socio-economic development.

This indicator for FQ1 shows the cumulative number of empty properties has exceeded the baseline.

2025/26 FQ1	A&B	277	276	-1	Green - Actual below Baseline	A&Bs 'empty' vacancy rate is currently 3.37%. Although the measure against baseline is positive, this % does represent a slightly higher figure (0.5%) versus historic analysis. The suite of empty business property policy changes implemented by the council are positive and the market is responding to the new extended property relief and the business grant scheme. The role of town centres is multi-faceted so they are impacted by many externalities. These can be an acute in rural economies already facing challenges with depopulation, declining workforce, accessibility and macro-economic factors. Ongoing work is required to diagnose the issues currently affecting each of our town centres, and provide a framework of approaches/interventions to support their revival.
