Responsible Person: Fergus Walker

This indicator is a Corporate Outcome Indicator that is reported quarterly. The performance presented is Council-wide only.

Period	Area	Target	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	A&B	95.3%	129.2%	33.9%	Green - Actual exceeds Target	As at FQ4 2025/26, total spend of £592k represents 129.2% of the Scottish Government allocation (£458k), reflecting sustained high demand and the Council's approach to maximising use of the fund to support vulnerable households. While expenditure exceeds the core grant, it is being managed within the overall approved budget and does not represent an overspend. Performance against the indicator remains positive, demonstrating that available funding is being effectively utilised to meet demand in line with policy intent

This indicator for FQ4 exceeds the target and performance has increased since the last reporting period.

Actual trend line	Period	Actual
	2024/25 FQ4	119.8%

	2025/26 FQ3	125.7%
	2025/26 FQ4	129.2%

FQ3 Commentary

As at FQ3 2025/26, 1,580 applications were received and 923 awards made (£431,883), a 12% increase on the same period last year. Expenditure is £88,170 above profiled Scottish Government funding reflecting higher demand. This is being managed within the total budget available, including the Council's £250,000 contribution, and does not represent an overall overspend.

Number of parking penalty notices issued

Responsible Person: Hugh O'Neill

This indicator is reported quarterly. The performance presented is at area level and Council-wide.

Period	Area	Target	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	B&C	No Target	187	N/A	N/A	There has been a decrease in the number of Penalty Charge Notices issued, this is in part due to lining and Traffic Regulation Order issues in the area - which has meant some areas cannot be enforced due to lining requiring to be redone. At present due to having no Traffic Service Officer in place, we are unable to progress Traffic Regulation Orders, but this will be addressed once the RIS restructure has been finalised.

This indicator for FQ4 shows the number of parking penalty notices has decreased since the last reporting period.

Actual trend line	Period	Actual
	2024/25 FQ4	313

	2025/26 FQ2	310
	2025/26 FQ3	299
	2025/26 FQ4	187

FQ3 Commentary

Increased compared to previous financial years FQ3. This may reflect an impact of both the increased staffing level (warden resource increased from 6f.t.e to 8f.t.e) and the enforcement of the pavement parking prohibitions. There is a reduction in Penalty Charge Notices issued compared to FQ2 2025/26, however, it is normal for the number to vary. The reasons for variations can range from a reduction in the number of visitors to the impact of weather.

2025/26 FQ4	A&B	No Target	2,087	N/A	N/A	Increase in Penalty Charge Notices as a result of the 2 wardens now in place and providing more high visibility patrols.

FQ3 Commentary

Increased compared to previous financial years FQ3. This may reflect an impact off both the increased staffing level (warden resource increased from 6f.t.e to 8f.t.e) and the enforcement of the pavement parking prohibitions. There is a reduction in PCNs issued compared to FQ2 2025/26, however, it is normal for the number to vary. The reasons for variations can range from a reduction in the number of visitors to the impact of weather.

Number of empty properties

Responsible Person: Jonathan Welch

This indicator is reported quarterly. The performance presented is at area level and Council-wide.

Period	Area	Baseline	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	B&C	79	90	11	Red - Actual exceeds Baseline	The rate of empty property relief stands at 5.84%. We have granted assisted 11 projects with a total of £100,000 plus others such as The Royal Hotel, Tighnabruaich with rates relief as it is undergoing comprehensive refurbishment. 6 projects have concluded with 4 underway. The increased numbers of empty properties is driven by a number of industrial and office units in the Sandbank. There remains a high volume of grant enquiries from Dunoon and we've a number of pipeline projects in Rothesay which will result in openings.

This indicator for FQ4 shows the cumulative number of empty properties has exceeded the baseline.

	2025/26 FQ3	68
	2025/26 FQ4	90

FQ3 Commentary

The empty rate is currently 4.38% in Bute & Cowal. In the past quarter, we have seen a decline in the number of properties claiming empty property relief. These declines are evidenced in both Rothesay and Dunoon town centres. To date, the empty business property officer has assisted 3 grant-aided projects that are fully claimed with 3 businesses now trading from the properties. We have 2 properties with grant offers issued, and another 2 with live projects in progress. There are a further 5 projects at application stage, with 5-6 additional enquiries. There is positive momentum in the B&C area, however the rate of 4.8% is the highest in A&B, so more focused work is required.

2025/26 FQ4	A&B	277	322	45	Red - Actual exceeds Baseline	The empty relief rate has increased by almost 1% in the past quarter, however, this is the first Q4 reporting and arguably the toughest in terms of trading conditions as a result of seasonality, poor weather plus the anticipation of impacts of the macro economic environment on subjects such as revaluations and resultant increases in rateable value plus National Minimum Wage and National Insurance contributions will have resulted in more exits from the market. On that basis, it is critically important that we continue to advance interventions in our town centres, and help address market failure re: costs of repurposing etc are going to act as barriers to investment.

FQ3 Commentary

The empty rate is currently 3.27%, which is down from 3.38% in the previous quarter. We have seen a decline in the number of properties claiming empty property relief, and the empty business property grant scheme, plus the extended property relief have both proven useful in supporting owners or incoming tenants. The support is warmly welcomed by the private sector, as the trading environment is challenging, so the financial support to help de-risk business start-up, expansion and alternative usage is proving a positive intervention.

	2025/26 FQ1	2.44

FQ3 Commentary

Working days lost due to sickness have increased this quarter, consistent with patterns observed more widely across the sector. While seasonal factors, including the festive period, have influenced this position, it should also be viewed in the context of sustained national increases and longer-term trends in sickness absence. The 2024/25 SPI sickness absence figures for Scottish Councils similarly highlight a relative decline in benchmarking position, reinforcing the need for continued monitoring and consistent management action.

NB last year's data was impacted by the transition to the new systems. LGBF data was not available until after the AP report was finalised at team level.

2025/26 FQ4	A&B	No Target	2.58	N/A	N/A	Overall, sickness absence performance in FQ4 has been mixed, with some areas showing positive reductions in working days lost, while others have seen a slight increase or remained in line with the same period last year. This suggests that while some progress is being made, absence patterns continue to vary across services. Targeted support, focused management engagement, and ongoing monitoring will remain key to sustaining improvement and addressing areas of higher absence. Target training in the Supporting Attendance at Work Procedures has been undertaken with managers

FQ3 Commentary

Working days lost due to sickness have increased this quarter, with levels remaining below those recorded in the same period last year. While this represents a positive position locally, it sits within a wider context of sustained national increases and longer-term upward trends in sickness absence. This is reflected in the 2024/25 SPI sickness absence figures for Scottish Councils, which show a relative deterioration in benchmarking position. Ongoing proactive absence management will remain important to sustain improvement and minimise future risk.

		2024/25 FQ4	5.68	Working days lost due to sickness have increased slightly this quarter. While levels remain broadly in line with the same period last year, this position should be viewed in the context of sustained national increases in sickness absence and longer-term upward trends across the sector. This is also reflected in the 2024/25 SPI sickness absence figures for Scottish Councils, which indicate a relative deterioration in benchmarking position despite short-term local variation. Seasonal factors, including the festive period, continue to impact absence levels, alongside wider workforce pressures. Continued focus on proactive absence management and early intervention will be essential to prevent further increases. NB last year's data was impacted by the transition to the new systems.
