This indicator is a Corporate Outcome Indicator that is reported quarterly. The performance presented is Council-wide only.

Period	Area	Target	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	A&B	95.3%	129.2%	33.9%	Green - Actual exceeds Target	As at FQ4 2025/26, total spend of £592k represents 129.2% of the Scottish Government allocation (£458k), reflecting sustained high demand and the Council's approach to maximising use of the fund to support vulnerable households. While expenditure exceeds the core grant, it is being managed within the overall approved budget and does not represent an overspend. Performance against the indicator remains positive, demonstrating that available funding is being effectively utilised to meet demand in line with policy intent

This indicator for FQ4 exceeds the target and performance has increased since the last reporting period.

Actual trend line	Period	Actual
	2024/25 FQ4	119.8%

	2025/26 FQ3	125.7%
	2025/26 FQ4	129.2%

FQ3 Commentary

As at FQ3 2025/26, 1,580 applications were received and 923 awards made (£431,883), a 12% increase on the same period last year. Expenditure is £88,170 above profiled Scottish Government funding reflecting higher demand. This is being managed within the total budget available, including the Council's £250,000 contribution, and does not represent an overall overspend.

Number of parking penalty notices issued

Responsible Person: Hugh O'Neill

This indicator is reported quarterly. The performance presented is at area level and Council-wide.

Period	Area	Target	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	MAKI	No Target	93	N/A	N/A	There is now a full time warden in place in Campbeltown which has seen an increase in activity in this area and explains the increase in Penalty Charge Notices issued.

This indicator for FQ4 shows the number of parking penalty notices has increased since the last reporting period.

Actual trend line	Period	Actual

	2025/26 FQ2	123
	2025/26 FQ3	77
	2025/26 FQ4	93

FQ3 Commentary

Increased compared to previous financial years FQ3. This may reflect an impact of both the increased staffing level (warden resource increased from 6f.t.e to 8f.t.e) and the enforcement of the pavement parking prohibitions. There is a reduction in Penalty Charge Notices issued compared to FQ2 2025/26, however, it is normal for the number to vary. The reasons for variations can range from a reduction in the number of visitors to the impact of weather.

2025/26 FQ4	A&B	No Target	2,087	N/A	N/A	Increase in Penalty Charge Notices as a result of the 2 wardens now in place and providing more high visibility patrols.

Average number of weeks to determine householder planning applications

Responsible Person: Peter Bain

This indicator is reported quarterly. The performance presented is at area level and Council-wide.

Period	Area	Target	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	MAKI	8.0	21.0	13.0	Red - Actual exceeds Target	Performance across the Development Management Service has been impacted by a significant backlog of casework. Whilst issues relating to staff resource availability have been resolved and output has improved it is highlighted that KPI's measuring average time taken remain adversely affected by the resolution of increasing volumes of 'legacy' casework. The Council's target for 'householder' applications has been revised to 10 weeks although this is not yet reflected in the format of corporate reports. By FQ4 only a handful of 'householder' 'legacy' items remained, this has resulted in a general improvement across this particular performance measure. During FQ4, 9 'householder' applications were determined in Mid Argyll, Kintyre and the Islands, two of which were 'legacy' items. Excluding the legacy items, the remaining 7 applications were determined within an average time of 15.1 weeks.

This indicator for FQ4 exceeds the target however performance has increased since the last reporting period.

Performance across the Development Management Service has been impacted by a significant backlog of casework. Whilst issues relating to staff resource availability have been resolved and output has significantly improved it is highlighted that KPI's measuring average time taken remain adversely affected by the resolution of increasing volumes of 'legacy' casework. Number of empty properties

Responsible Person: Jonathan Welch

This indicator is reported quarterly. The performance presented is at area level and Council-wide.

Period	Area	Baseline	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	MAKI	104	117	13	Red - Actual exceeds Baseline	The empty relief rate is currently at 4.96% and unlike other admin areas, we have seen increases in numbers of properties across all intermediate zones. We have assisted 10 projects with £77,000 in grant awards which has resulted in x 6 openings, with the remainder work in progress or seeking consents. These projects include the conversion of a shop in Tarbert into a multi-functional community space, the reopening of the Lord of the Isles in Craobh Haven, old Scottish Hydro shop in Lochgilphead, and most notably a new Aparthotel in Campbeltown. We've also sanctioned rates relief for Cairnbaan Hotel (which has now secured planning permission for the listed building.)

This indicator for FQ4 shows the cumulative number of empty properties has exceeded the baseline.

	2025/26 FQ4	117

FQ3 Commentary

The empty rate is currently 4.11% in MAKI. In the past quarter, we have seen a slight increase in the number of properties claiming empty property relief. The increase is evidenced in Lochgilphead. To date, the empty business property officer has assisted 2 grant-aided projects that are fully claimed with 2 businesses now trading from the properties. We have a further 4 properties which are subject of live projects in progress, plus 6-7 projects at enquiry-application stage. There is positive momentum across MAKI however, projects are slow to advance for a variety of reasons, i.e.: owner capacity, trades availability or complexity due to size/type of property, consents or state of repair.

2025/26 FQ4	A&B	277	322	45	Red - Actual exceeds Baseline	The empty relief rate has increased by almost 1% in the past quarter, however, this is the first Q4 reporting and arguably the toughest in terms of trading conditions as a result of seasonality, poor weather plus the anticipation of impacts of the macro economic environment on subjects such as revaluations and resultant increases in rateable value plus National Minimum Wage and National Insurance contributions will have resulted in more exits from the market. On that basis, it is critically important that we continue to advance interventions in our town centres, and help address market failure re: costs of repurposing etc are going to act as barriers to investment.

FQ3 Commentary

The empty rate is currently 3.27%, which is down from 3.38% in the previous quarter. We have seen a decline in the number of properties claiming empty property relief, and the empty business property grant scheme, plus the extended property relief have both proven useful in supporting owners or incoming tenants. The support is warmly welcomed by the private sector, as the trading environment is challenging, so the financial support to help de-risk business start-up, expansion and alternative usage is proving a positive intervention.

Period	Area	Target	Actual	Variance	Status	FQ4 Commentary
2025/26 FQ4	MAKI	No Target	3.05	N/A	N/A	Working days lost due to sickness have increased slightly again in FQ4, which may partly reflect a larger workforce and therefore a higher number of employees contributing to sickness levels. To sustain improvement and future risk, proactive absence management will continue, supported by interventions such as refresher training for managers on attendance procedures, timely case reviews, and consistent application of support measures.

This indicator for FQ4 shows the number of sickness absence days has increased since the last reporting period.

Actual trend line	Period	Actual

	2025/26 FQ2	2.00
	2025/26 FQ3	2.97
	2025/26 FQ4	3.05

FQ3 Commentary

Working days lost due to sickness have increased this quarter, and are still higher than the same quarter last year. This is consistent with patterns observed more widely across the sector. While seasonal factors, including the festive period, have influenced this position, it should also be viewed in the context of sustained national increases and longer-term trends in sickness absence. The 2024/25 SPI sickness absence figures for Scottish Councils similarly highlight a relative decline in benchmarking position, reinforcing the need for continued monitoring and consistent management action. NB last year's data was impacted by the transition to the new systems. LGBF data was not available until after the AP report was finalised at team level.

2025/26 FQ4	A&B	No Target	2.58	N/A	N/A	Overall, sickness absence performance in FQ4 has been mixed, with some areas showing positive reductions in working days lost, while others have seen a slight increase or remained in line with the same period last year. This suggests that while some progress is being made, absence patterns continue to vary across services. Targeted support, focused management engagement, and ongoing monitoring will remain key to sustaining improvement and addressing areas of higher absence. Target training in the Supporting Attendance at Work Procedures has been undertaken with managers

FQ3 Commentary

Working days lost due to sickness have increased this quarter, with levels remaining below those recorded in the same period last year. While this represents a positive position locally, it sits within a wider context of sustained national increases and longer-term upward trends in sickness absence. This is reflected in the 2024/25 SPI sickness absence figures for Scottish Councils, which show a relative deterioration in benchmarking position. Ongoing proactive absence management will remain important to sustain improvement and minimise future risk. NB last year's data was impacted by the transition to the new systems. LGBF data was not available until after the AP report

was finalised at team level.
