

Locality Profile Information – Bute

How many people live here?

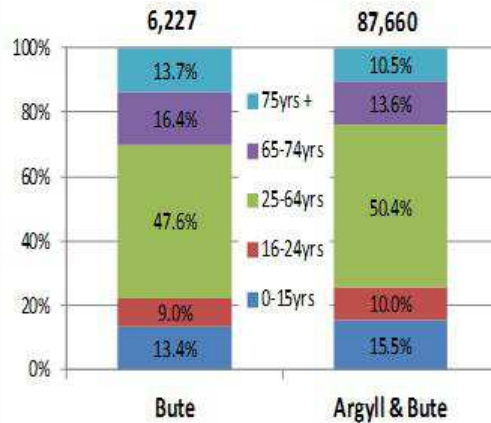

Bute Population Over Time

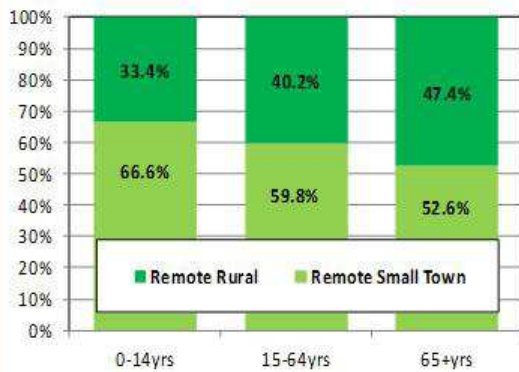

Summary: The total population of Bute has decreased whilst the number aged 65+ has increased.
Source: National Records of Scotland (NRS) Small Area Population Estimates (SAPE). Best fit of 2001 and 2011 datazones to locality area.

Population by Age

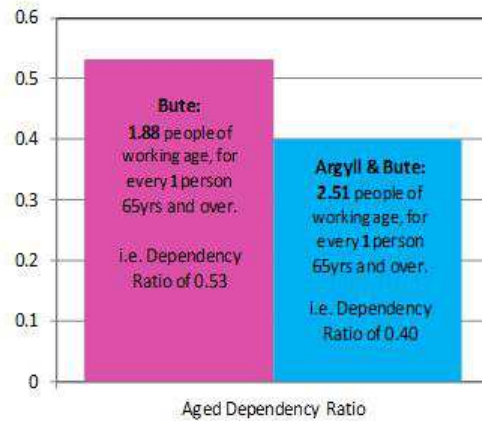

Summary: Bute has a lower proportion of children and a higher proportion of older people than Argyll and Bute as a whole.
Source: National Records of Scotland (NRS) Small Area Population Estimates (SAPE), Mid Year 2014. Best fit of 2011 datazones.

Population by Urban/Rural Classification

Summary: All areas are classified as remote. Older people are more likely to live in rural areas.
Source: NRS Small Area Population Estimates, 2014. Scottish Government 6-fold Urban-Rural Classification 2012. Best fit of 2011 datazones to locality areas.

Dependency Ratio

Note: The dependency ratio ignores the fact that not all of those 65+ are necessarily dependent (an increasing proportion of whom are working) and that many of those of 'working age' are not actually working.
Source: Calculated from National Records of Scotland Small Area Population Estimates, Mid Year 2014. Best fit of 2011 datazones to locality areas.

Locality Profile Information – Bute

What circumstances do people live in?

Scottish Index of Multiple Deprivation

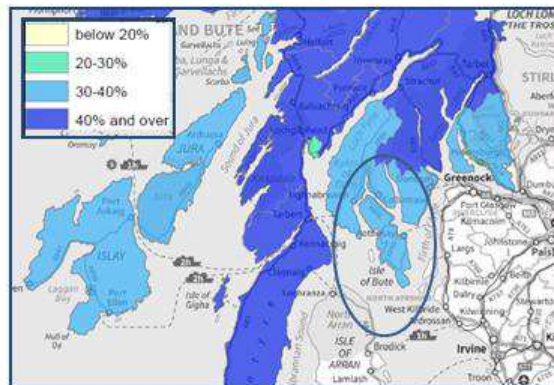

Summary: 17% of the population on Bute live in an area within the 20% most deprived areas in Scotland. These are all within Rothesay. There are no areas within the least deprived in Scotland.

Be aware that: Where populations in small areas are from mixed socio-economic backgrounds, which is more common in rural areas, deprivation may be hidden in this measure.

Source: 2013 Mid-year population estimates, National Records of Scotland. Scottish Index of Multiple Deprivation 2012, Scottish Government. Data best-fit of 2001 datazones to locality areas.

% households in Fuel Poverty

© Crown copyright and database right (2014). All rights reserved. Ordnance Survey license number 100024655. The Scottish Government 1 August 2014

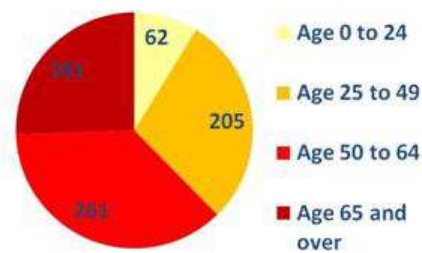

Summary: 30-40% of households on Bute are estimated to be in fuel poverty.

Be aware that: Data are based on 2001 intermediate geography areas and are estimated from a model. Different estimates of fuel poverty exist from different sources. All indicate relatively high levels of fuel poverty in rural areas of Argyll and Bute.

Source: Local Indicators of Fuel Poverty, 2014, Scottish Government.

Unpaid care

Number of people reporting providing unpaid care (census 2011)

Summary: 709 out of 6,415 people living in households reported providing unpaid care. An Argyll and Bute survey found that 60% of carers received some support in their role but that 40% did not.

Be aware that: There are likely to be more unpaid carers than reported; people providing care for family/friends do not always consider themselves to be carers.

Source: National Records of Scotland, Census 2011. Best fit of 2001 datazones to locality area. Argyll and Bute Citizens' panel 2014 Health and Wellbeing Survey.

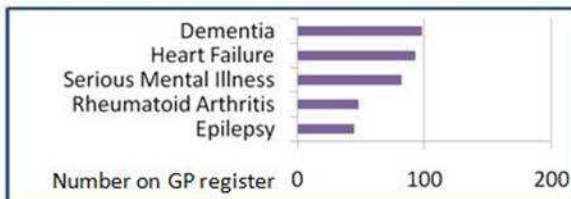

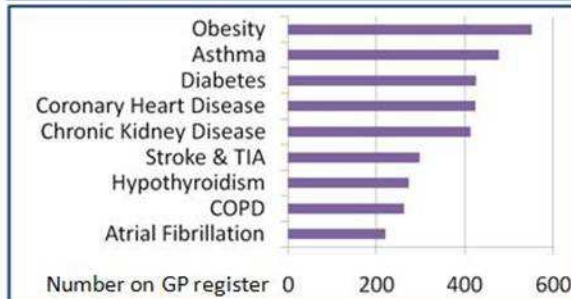

Locality Profile Information – Bute

What health conditions do people live with?

Number of People with Different Conditions

Summary: Conditions which occur often, and with which a person can live for a long time, are common. Many common conditions have similar lifestyle risk factors. Conditions have different care needs.

Be aware that: GP data only include people registered at the Bute GP practice with the condition and may underestimate numbers with conditions. People may be on more than one register. Data from census are self-reported.

Source: GP: NHS National Services Scotland QOF data 2013/14, Census 2011: National Records of Scotland., Best fit to 2001 datazones. Annual Cancer registrations (average 2012-2014): NHS National Services Scotland.

Life Expectancy

Summary: Life expectancy is lower for males than females. Male life expectancy in Rothesay is lower than for Argyll and Bute as a whole.

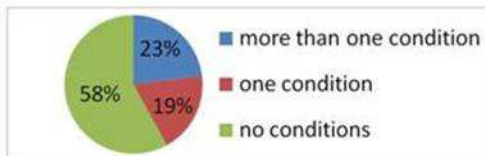

Be aware that: Data only based on 2001

Intermediate Geographies.

Multimorbidity - More Than One Condition

- Multimorbidity means having more than one long-term condition.
- Levels of multimorbidity have been estimated for Scotland as a whole (Barnett et. al. 2012).

- Multimorbidity is more common with increasing age but the total number of people with multimorbidity and aged under 65 is higher than the total number aged 65+
- Multimorbidity starts 10-15 years earlier in most deprived compared to least deprived areas

Health and Social Care Risk Behaviours

Alcohol Related Hospital Stays

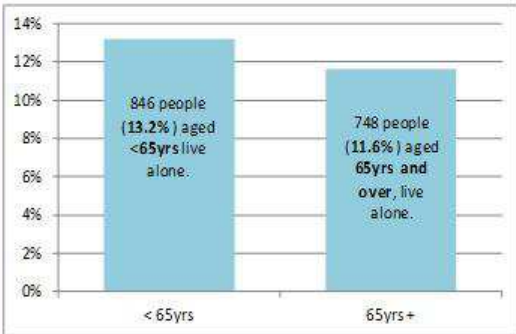

Summary: Rates of alcohol-related hospital stays are comparable to Argyll and Bute as a whole. Many alcohol-related hospital stays could be prevented.

Definition: General acute inpatient and day case stays with a diagnosis of alcohol misuse in any diagnostic position: number and directly age-sex standardised rate per 100,000 population. Based on 2001 intermediate geographies.

Source: Scottish Public Health Observatory (ScotPHO), 2013/14 financial year. CI 95%.

Isolation

Single Households on Bute

Summary: People living alone may be at risk of social isolation.
