

Locality Profile Information – Oban and Lorn

How many people live here?

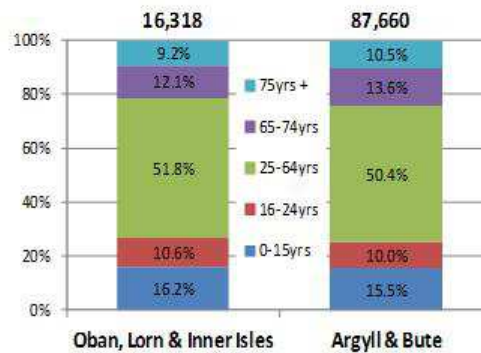

Oban, Lorn & Inner Isles Population Over Time

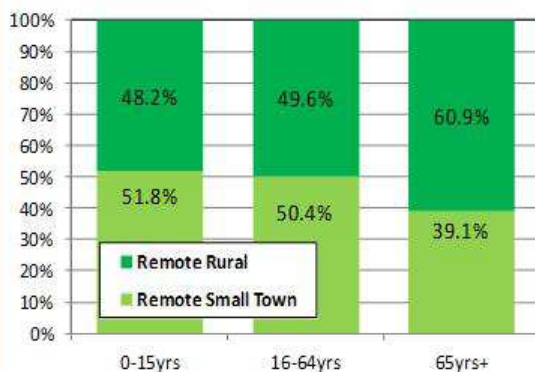

Summary: The total population of Oban, Lorn & the Inner Isles has increased slightly, whilst the number of those over 65yrs has increased to a greater degree.
Source: National Records of Scotland (NRS) Small Area Population Estimates (SAPE). Best fit of 2001 and 2011 datazones to locality area.

Population by Age

Summary: Oban, Lorn & the Inner Isles has a slightly lower proportion of the '65s and over' age group, compared to Argyll and Bute as a whole.
Source: National Records of Scotland (NRS) Small Area Population Estimates (SAPE), Mid Year 2014. Best fit to 2011 datazones.

Population by Urban/Rural Classification

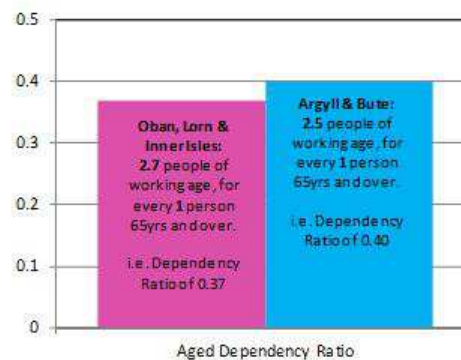

Summary: Those aged 65 and over are more likely to be living in an area classified as Remote Rural.
Source: NRS Small Area Population Estimates, 2014. Scottish Government 6-fold Urban-Rural Classification 2012. Best fit to 2011 datazones.

No access to a private car:
 'Remote Rural' areas, 13%
 'Remote Small Towns', 31%
Source: Estimates based upon a sample of 100 people, Scottish Household Survey, 2014.

Dependency Ratio

Summary: Oban, Lorn & the Inner Isles Aged Dependency Ratio is lower than that of Argyll & Bute's Aged Dependency Ratio, i.e. Oban, Lorn & Inner Isles has a higher proportion of working age population to support those 65yrs and over.

Note: The dependency ratio ignores the fact that not all of those 65+ are necessarily dependent (an increasing proportion of whom are working) and that many of those of 'working age' are not actually working.
Source: Calculated from National Records of Scotland Small Area Population Estimates, Mid Year 2014. Best fit to 2011 datazones.

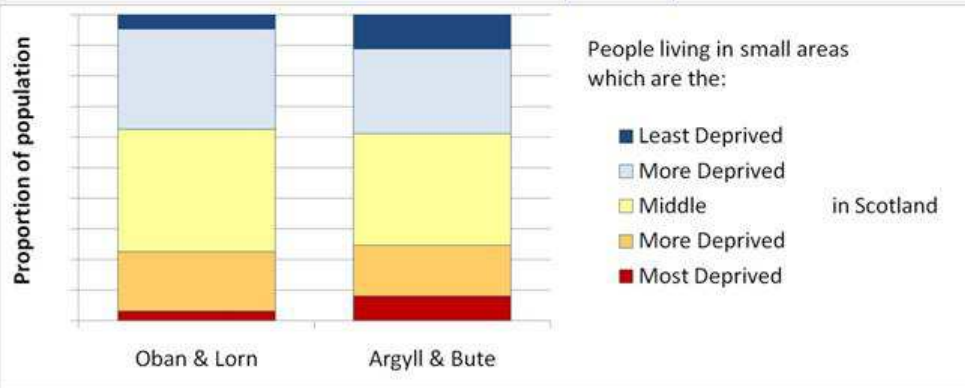

Locality Profile Information – Oban and Lorn

What circumstances do people live in?

Scottish Index of Multiple Deprivation

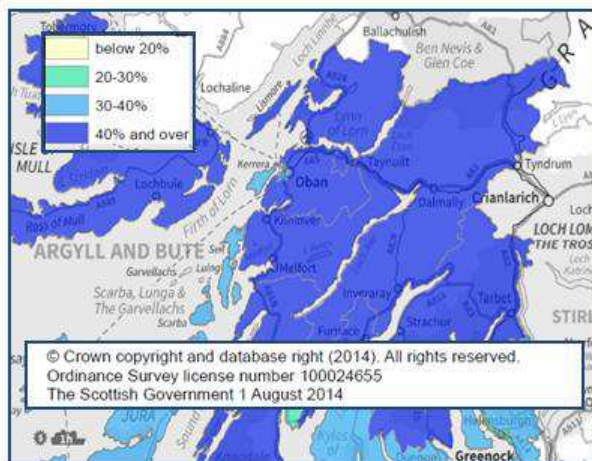

Summary: 3% of the population of Oban and Lorn live in an area within the 20% most deprived areas in Scotland. These people live in one small area within the centre of Oban. There is a different small area within Oban within the least deprived in Scotland.

Be aware that: Where populations in small areas are from mixed socio-economic backgrounds, which is more common in rural areas, deprivation may be hidden in this measure.

Source: 2013 Mid-year population estimates, National Records of Scotland. Scottish Index of Multiple Deprivation 2012, Scottish Government. Data best-fit of 2001 datazones to locality areas.

% households in Fuel Poverty

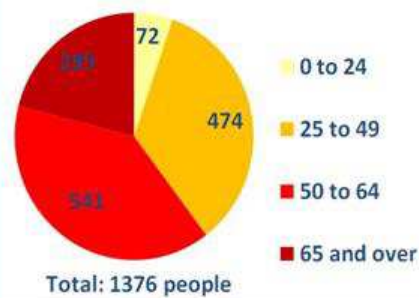

Summary: Within rural areas of mainland Oban and Lorn, over 40% of households are estimated to be in fuel poverty. In Oban, 30-40% are estimated to be in fuel poverty.

Be aware that: Data based on 2001 intermediate geography and are estimated from a model. Different estimates of fuel poverty exist from different sources. All indicate relatively high levels of fuel poverty in rural areas of Argyll and Bute.

Source: Local Indicators of Fuel Poverty, 2014, Scottish Government.

Unpaid care

Number of people reporting providing unpaid care by age (census 2011)

Summary: 1376 out of 15,708 people living in households reported providing unpaid care. An Argyll and Bute survey found that 60% of carers received some support in their role but that 40% did not.

Be aware that: There are likely to be more unpaid carers than reported; people providing care for family/friends do not always consider themselves to be carers.

Source: National Records of Scotland, Census 2011. Best fit of 2001 datazones to locality area. Argyll and Bute Citizens' panel 2014 Health and Wellbeing Survey.

Locality Profile Information – Oban and Lorn

Health Conditions and Life Expectancy

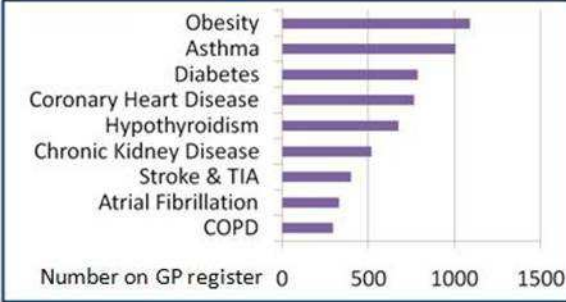

Number of People with Different Conditions

Hypertension

Number on GP register 0 1000 2000 3000

Number on GP register 0 500 1000 1500

Number on GP register 0 100 200

Number at Census 0 1000 2000

Number at Census 0 100 200 300 400 500 600

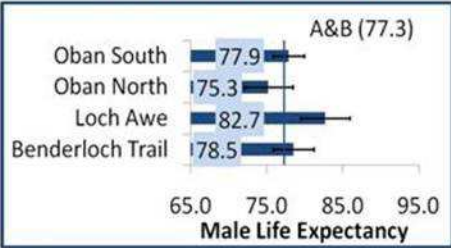

Annual average 0 50 100 150 200

Summary: Conditions which occur often, and with which a person can live for a long time, are common. Many common conditions have similar lifestyle risk factors. Conditions have different care needs.
Be aware that: GP data only include people registered at the GP practices with the condition and may underestimate numbers with conditions. *Data suppressed from one GP practice due to small numbers. People may be on more than one register. Data from census are self-reported.
 Source: GP: NHS National Services Scotland QOF data 2013/14, Census 2011: National Records of Scotland. Best fit of 2001 datazones. Annual Cancer registrations (average 2012-2014): NHS National Services Scotland.

Life Expectancy

Male Life Expectancy

65.0 75.0 85.0 95.0

Female Life Expectancy

65.0 75.0 85.0 95.0

Summary: Life expectancy is lower for males than females. Female life expectancy in Loch Awe is higher than for Argyll and Bute as a whole.
Be aware that: Data based on 2001 Intermediate Geographies. Loch Awe includes Inveraray.
 Source: ScotPHO Health and Wellbeing Profile. Data from 2009-2013.

Multimorbidity - More Than One Condition

- Multimorbidity means having more than one long-term condition.
- Levels of multimorbidity have been estimated for Scotland as a whole (Barnett et. al. 2012).

- Multimorbidity is more common with increasing age but the total number of people with multimorbidity and aged under 65 is higher than the total number aged 65+
- Multimorbidity starts 10-15 years earlier in most deprived compared to least deprived areas
